SKILLS

progamming language

Java,C basic

Database

SQL,MYSQL

Web Technologies

Html,CSS,JavaScripts

Framework

Spring Boot ,Hibernate

Soft Skills

Problem Solving ,Presentation Skills,

COURSE & CERTIFICATION

Java Fullstack Tranning - The Kiran Academy(javabykiran)

- A structured fullstack development tranning focused on backend + frontend essentials

Key Learning Areas

- Core Java,OOPs,Exception Handling,Collections
- JDBC connectivity with MySQL database
- Basics of REST API development using Spring Boot
- MVC architecture understanding
- Mini - project based practical tranning

EDUCATION

Sinhgad College Of Science

2022-2025

Bachlor of Business Admistation in Computer Application

Vidya Pratishthan ,Baramati

2020-2022

Higher Secondary Certificate(HSC)

Mahilshram High School Karvengar pune

2019-2020

Secondary School Certificate (SSC)

PROJECTS

1. BookMyShow Ticket Booking System

- **Technologies :** Java, Core Java, OOP Concepts, Collections Framework, Exception Handling, Eclipse IDE
- Developed a Java-based BookMyShow Ticket Booking System to allow users to select movies and book tickets
- Implemented features such as theater selection, seat booking, and ticket confirmation for better user experience.
- Used Object-Oriented Programming concepts and Java Collections for efficient data management.
- Built a simple and user-friendly console-based application using Core Java.

2. Portfolio Makeup Artist

- **Technologies** : Java , Html, CSS , Java Script, MySQL
- Created a portfolio website to showcase makeup artist services, gallery, and client information.
- Developed backend logic using Java and connected it with MySQL database.
- Implemented interactive features using JavaScript for better user experience. Focused on clean UI design and structured code.

3. Employee Management System

- **Technologies** : HTML, CSS, Java, React, MySQL
- Built an employee management system to manage employee records such as add, update, and view employee details. Developed frontend components using React for a dynamic user interface.
- Implemented business logic using Java for data handling.
- Ensured modular and reusable code structure.
